Work Experience

November 2023 - Present
Scholastica Limited || Baridhara J Block, Dhaka-1230
Junior Officer, Operations

As a Junior Officer in Operations, I handle a wide range of tasks including character creation, PowerPoint presentations, advertisement design, business card and logo creation, data entry, research, and management. Additionally, I serve as a tech trainer and contribute to social media poster design and marketing efforts as part of the operations team. My role demands versatility and adaptability across various aspects of operations and creative tasks.

June 2023 - September 2023
Scholastica Limited || Baridhara J Block, Dhaka-1230
Internship

My role involved creating various graphics such as characters, presentations, advertisements, business cards, logos, and conducting data entry and research tasks. Additionally, I contributed to social media marketing efforts as part of the operations team, designing posters and so on..

2022 - Present
Freelancing Marketplace
Graphic Designer

As a freelance graphic designer in online marketplaces, I've gained diverse experience working on various projects such as business cards, flyers, logos, brochures, packaging, food menu designs, and more. My portfolio reflects my versatility and creativity in meeting client needs across different design categories.

Projects Experience

○ 2019 - 2023
Web Design & Development
Build websites for university Study purpose

I made websites for university learning. I built different kinds of sites, like ones for studying online, buying and selling cars and bikes, and ordering food online. I kept learning new things about making websites better.

○ 2022 - 2023
Machine Learning
Skin cancer detection with machine learning

In my final year, as part of a team, we focused on using machine learning to detect skin cancer. With five members, we pre-trained a model using a dataset of 10,000 samples. Successfully training and testing the model, our project proved to be a success, demonstrating the potential of machine learning in skin cancer detection.

○ 2023
Research Based Project || Thesis
Future Intelligent System Using AI & Database technology

Last semester, we conducted research on future intelligent systems utilizing AI and database technology. Our focus was on exploring various types of intelligent systems and their capabilities in managing big data and efficiently distributing tasks among employees.
